LIVENODES ECOSYSTEM

Livenodes is blockchain-based developed ecosystem, which builds multiple services and products with practical use cases. It's a well known fact that crypto-projects are evaluated by market sentiments and the use cases the project is intending to solve. Livenodes, unlike other projects that are focused on the specificity of a single utility, has multiple use cases that solve real world problems.

Livenodes is active in the industry since mid 2018, launching its first usecase in July, 2018 under Crypto Masters brand. Having an active marketing service provider, Livenodes supports a wide array of blockchain platforms and startups, and actively participates in industry and community development. Speed, human interaction and simplicity are what make us special. Livenodes' future looks very bright, and we plan on remaining on the forefront of this technology, creating more tools and services for everyone to use in innovative new ways.

We are committed to being a driving force in the blockchain revolution by increasing adoption of this innovative technology around the globe.

Our aim is to create convenient and effective platforms that cryptocurrency investors want to use.

Our mission is to help advance the blockchain industry by fostering innovation, nurturing new and emerging technology, and driving transformative change.

USECASES

Crypto Masters

Achieved in July 2018, Crypto Masters is already an active service provider and is meant to be the first use case for Livenodes coin.

Crypto Masters offers variety of valuable digital marketing services, making crypto marketing strategy consolidated, specific, effective, responsive and expeditious. Crypto Masters Team reaches millions of crypto enthusiast, on the right platforms. Giving straightforward offers with obvious results, raising interest and awareness in a project. With years and years of experience in crypto marketing field Crypto Masters team is professional, committed and friendly with the right connections. In today's market turning users into investors is getting harder, Crypto Masters team is unique in this transformation process, as team expands the services and invariably offers new ways of boosting crypto projects to next level. Crypto Masters is continuously evolving, and the team constantly works on developing new features and sub-projects that can help customers grow their crypto projects.

Crypto Masters goal is to provide effective advertising and promotional solutions in crypto industry. Crypto Masters tools are designed to help to promote crypto projects and the continuously expanding crypto niche.

Crypto Masters is trusted by hundreds of businesses – worldwide

LiveNodes Monitoring and stats Service

MONITORING SYSTEM

Livenodes monitoring and stats service is planned to launch on Q2, 2019. LNO monitors and allows comparing different masternodes. Tracking a variety of features about masternode coins allows anyone willing to invest in masternode coins to get authentic and exact statistics when deciding on the masternodes and to analyze the coins as they should when investing. On the Livenodes monitoring and stats website, users are able to analyze the details of the coin, last traded price, change and volume of trades within 24 hours, marketcap of masternode coin, daily, weekly, monthly and annual return on investment of a particular coin. Value of masternode based on current price and the percentage of total locked supply will be available too. For each coin users are able to check all the official links. Therefore in addition to ROI users are able to check and investigate about community, development team, purpose of the platform and wallets.

LiveNodes Monitoring and stats Service charges one-time fee to list masternode coins and tiers. Fee must be paid in LNO coins.

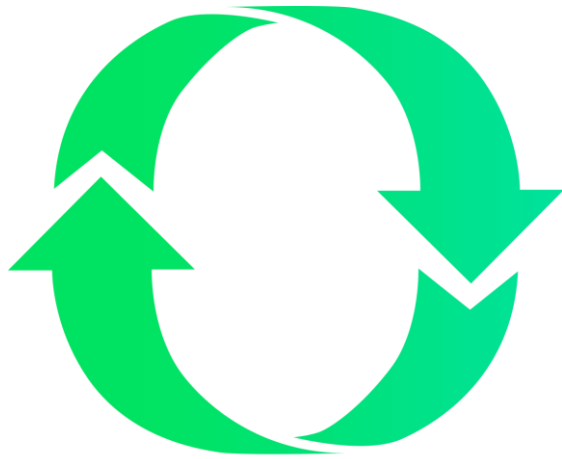

PoS/ PoW/MN pool

Livenodes PoS/PoW/MN pool is planned to launch on Q4, 2019. LiveNodes Pool will be the first of its kind platform. It will be unique due to the fact that it gives users the opportunity to mine/stake their PoW/PoS and masternode coins in one platform. With a whole new vision it will offer many features to its users. The platform's concept is to be as user-friendly as possible, and it aims to provide an amazing experience and many functionalities. Running a masternode or staking coins requires a server that always has a high-speed connection to the internet. Some people don't want to- or aren't able to- deal with the complexity of server setup and maintenance. LiveNodes pool takes the hassle out of staking by taking care of the technical details. LiveNodes pool leads your mining efforts towards bigger and better profit.

LiveNodes Pool will have an affiliate marketing program that will stimulate users to share the platform with their friends and followers. This will help us to promote LiveNodes Pool services round the clock. Indulge in the world of cryptocurrency mining and make use of its profit-making opportunities. LiveNodes pool demonstrate the true power of the community in cryptocurrencies. It is the first time in history that a currency has created virtual "jobs" for millions of people and allowed to make profit for supporting a cause. Shared processing power is sector that has barely been exploited by the mainstream yet, but has shown its potential to make the entire mining and data processing sectors radically more efficient.

Be part of the growing mining community, create a steady flow of income!

EXCHANGE

LiveNodes Exchange

Livenodes exchange is planned to launch on Q2, 2020. Security will always be a top priority for LiveNodes Exchange, and multiple layers of protection will be incorporated. The most reliable and powerful security technologies will be used to keep users' funds secure. We will design

custom trading engine to be scalable and to ensure that orders will be executed in real-time.

LiveNodes Exchange will be the easiest place to buy, sell and manage cryptocurrencies.

LiveNodes exchange will provide reliability, high-security environment and advanced order types like stop-loss orders. Livenodes exchange will also offer high liquidity and low fees with a wide variety of trading pairs and cryptocurrencies. LiveNodes Exchange will have an affiliate marketing program that will stimulate users to share the platform with their friends and followers. This will help us to promote LiveNodes Exchange worldwide.

LiveNodes Coin

An ability to offer a true value to the community and investors is the very first step towards creating substantial ecosystem, and thereby a lucrative crypto project. LNO coin empowers LiveNodes Ecosystem and Crypto Masters Services!
